
LDC Racing Sailboats are in the process of developing the RS500 - it is a single wire, easy to sail, youth/small-medium sized adult asymmetric. It incorporates all the best bits of a 29er and 420. It will be significantly cheaper than both, but still built in GRP, similar construction to the RS200.

- ✓ Designed to be more appealing for clubs than the difficult 29er or the symmetric and very expensive 420.
- ✓ Yardstick of around 1000, - stable enough for the "August sailors", and bouyant enough for Dad to enjoy...
- ✓ Should be at the January Boatshow ...and available for delivery next season, likely retail price **£4895 inc vat**, and launching trolley - comparing to £5795 29er, £6250 420, and £4495 Vago (this is polyethylene).

- LOA 4320mm / 14'2". (slightly longer than a 420)
- Beam 1600mm / 5'3" (slightly narrower than a 420)
- Fully fitted hull, inc sprit 80kg (same as a 420)
- GRP / coremat construction
- Designer: Phil Morrison / RS Racing
- The sail area is not cast in stone but it is more powerful than a 420 - and the hull is more bouyant but as stable.
- The asymmetric is generous to give a kick offwind.
- Purpose designed for the youth / family purchase for those that are not following the RYA youth squad route.

- The class will provide open training / open circuit and a real emphasis on the '15-25' age group. The ethos is to transcend the 'RYA Youth' label, attempting to align our youth sailors with the adult sport, keeping them sailing.
 - RS will have promotional literature by the January Boatshow - but will be happy to let the boat be sailed on the 10th December at Hayling Island Sailing Club.
